- Integrated animations with Motion for React and deployed apps via Vercel for global availability.

PROJECT SELECTION

E-Commerce Platform

A robust, full-featured e-commerce application with modern UI, optimized performance, and real-time functionality.
- Built with *Next.js, Hono tRPC, Drizzle ORM, Tailwind CSS, Shadcn UI, and Redis*.
- Features include product creation, image uploads, authentication with Auth.js, and a real-time admin dashboard.
- Integrated *Motion for React* for smooth transitions and UX enhancements.
- Deployed using *Vercel* and *Neon Postgres* for scalable backend operations.

Issue Tracker App

Inspired by professional project management tools, enabling issue tracking, team collaboration, and AI enhancements.
- Full-stack implementation with *Next.js, Prisma ORM, Auth.js, and Redis*.
- Added AI-based features: issue summarization, priority prediction, and semantic search.
- Modular, accessible UI built with *Shadcn UI and Radix primitives*.
